PROFESSIONAL EXPERIENCE

Griffin Greenhouse Supplies Inc., Tewksbury, MA — *Developer*

APRIL 2016 - Current

- Sole in-house developer for the company maintaining and customizing their legacy ASP Classic web sites
- Designing and building a new php/html/javascript/css website to replacing aging ASP Classic web sites
- Customizing and building ecommerce website in concert with business website.
- Designing and producing promotional video content based on existing footage and base on video design trends
- Supported data collection for assets required for website and cataloging company inventory

SurfMerchants LLC, Boston, MA — *Developer*

APRIL 2013 - FEBRUARY 2016

- Was on a team of developers maintaining and customizing their legacy PHP Web Application
- Was tasked with creating many PHP reports, exports, external interfaces and internal tools
- Used JavaScript, jquery and angular to write dynamic client-facing interfaces
- rebuilt their common export system, which routinely caused headaches and made simple projects take needlessly long amounts of time
- Handled scalability issues in reports and exports
- Worked with and around large sets of data on a legacy system, building systems to condense the data into usable formats.

4D Technologies, Bedford, NH — *Developer*

JANUARY 2012 - APRIL 2013

- Was the primary developer, responsible for maintaining customer-facing applications across several servers.
- Built automation tools to work with platform limitations and allow production teams to spend less time manually adding content to platforms - often saving weeks of manual input.
- Upgraded customer facing platforms and migrating service providers for video delivery platforms and hosting services.
- Built an internal tool called "Mobilize" which allowed new content to be distributed with minimal controls to hundreds of websites.
- Maintained and added features to existing customizations built for the Moodle platform.

Rovion, Boston, MA — *Developer*

SEPTEMBER 2011 - JANUARY 2012

- Developed software to support Rovion's core product, RAMP.
- Worked on bug fixes and features to the core product.
- Built an involved feature that allowed customers to preview ads built in the RAMP system on the customer's own site.

Wedü, Manchester, NH — *Developer*

JUNE 2010 - JULY 2011

- Built Client-Facing front end systems and web sites
- Parsed photoshop pages into functional HTML pages
- Build complete cross-browser compatible websites as marketing tools to clients

J-Cap Web Design, New Boston, NH — *Owner*

JUNE 2007 - MAY 2011

- Worked on PHP Applications for small businesses in the area
- Built HTML / CSS Websites for Clients in manchester and the surrounding area

Manchester Community College, Manchester, NH — *Tutor*

SEPTEMBER 2009 - DECEMBER 2009

- Taught HTML to students who did not come to the college with a technical background

HOA Online Resource, Goffstown, NH — *Training*

SEPTEMBER 2009 - DECEMBER 2009

- Learned PHP, HTML, and CSS from mentor
